## PUSH BUTTON DOUBLE POLE SWITCHES

## SWITCH

| TYPES | ORDER CODE |
| :--- | :---: |
| Push On / Push Off (OO) <br> Make and break action | B2OO |
| Momentary Action (NO) <br> Push to make, release to break <br> e.g. Bell Push | B2NO |
| Momentary Action (NC) <br> Push to break, release to make <br> e.g. Door open, light on | B2NC |
| Push On / Push Off (CH) <br> Make and break, reversed <br> action | B2CH |

## WIRING

| BASE | CABLE <br> ENTRY | CLAMPING <br> SCREW | ORDER <br> CODE |
| :--- | :--- | :--- | :--- |
| First | Short Side | Long side | SLSL |
| Second | Short Side | Long side |  |
| First | Mounting face | Long side | MLSL |
| Second | Short face | Long side |  |
| First | Solder tags (Long side of body) |  | STST |
|  | Second | Solder tags (Long side of body) |  |

## BUTTON COLOUR

| BUTTON | ORDER <br> CODE |
| :--- | :---: |
| White | W |
| Cream | C |
| Black | B |

## FIXING RINGS

| ITEM | ORDER <br> CODE |
| :--- | :---: |
| Long fixing ring, White (drawing overleaf) | 6 LW |
| Long fixing ring, Cream (drawing overleaf) | 6 LC |
| Short fixing ring, White (drawing overleaf) | 6 SW |
| Short fixing ring, Cream (drawing overleaf) | 6 SC |

## STANDARD SWITCHES

All Omeg manufactured Castelco switches have a M10 metric threaded mounting bush and fixing ring.

## WIRING

Screwed terminal locations as shown overleaf (order code SLSL, see table opposite).
STANDARD COLOURS
The switch body is white. The fixing ring and push button can be either cream or white.

NOTE: Switches with luminous buttons do not have luminous fixing rings.

## ACCESSORIES

| ITEM | ORDER <br> CODE |
| :--- | :---: |
| Fibre washer ( $\varnothing 15.9 \times 1.2 \mathrm{~mm}$ thick) | 44 |
| Hex. lock nut (M10) | 65 |

## ORDERING CODES

Example above: B2NOSLSLW/6LW is a push button double pole switch, momentary action, contacts normally open, standard SLSL wiring, with a white button and a long white fixing ring.

## OMEO PUSH BUTTON DOUBLE POLE SWITCHES (as formerly manufactured by CASTELCO)

## STANDARD UNITS

FIXING RINGS

LONG FIXING RING for panel thickness $0.5-3.5 \mathrm{~mm}$

## GLOSSARY OF SWITCH TERMINOLOGY

## SINGLE POLE (SP or 1S)

One circuit that is turned 'on' and then 'off' with each actuation. This action can be momentary.

## DOUBLE POLE (DP or 2S)

Two independent circuits that are turned 'on' and then 'off' with each actuation. This action can be momentary.

## TWO-CIRCUIT CHANGEOVER (CH)

Make and break, reversed action.
When the switch is actuated, circuit one turns 'on' and circuit two turns 'off'.
When the switch is actuated again the two circuits are reversed, circuit one turns 'off' and circuit two turns 'on'.

## PUSH ON / PUSH OFF (OO)

Each action returns the switch to the previous state and it stays in that state. However, unlike a switch with a lever (or similar external indication) you cannot know what state the switch is in until it is connected to an electrical circuit.

## MOMENTARY ACTION

NC - normally closed 'Push to break, release to make' e.g. bulb to light when a Door is opened.

NO - normally open 'Push to make, release to break' e.g. push button Bell action.
(Note: The 'Normal' position is when the switch is at rest i.e. NOT actuated).
